

Hyojin Kim

Software Engineer | IT Technical Support Engineer

Tel: +1 825-733-9679 | Email: hyojinlisa.kim@gmail.com | Calgary, AB, Canada

VISA & WORK ELIGIBILITY

- 2-Year Canadian Working Holiday Visa (Approved) — can be extended up to 4 years
- Eligible for Work Permit

SUMMARY

Proactive IT professional with 5+ years of experience in software development, automation, and technical support. Skilled in building Python- and SQL-based automation tools that reduce manual work, integrating cross-platform systems via API, and maintaining 99.9% network uptime. Seeking to contribute as a Junior Software Developer or IT Support Specialist in a growth-oriented team in Canada.

EDUCATION

Master's Degree in Security Information Soongsil University — S. Korea GPA 4.39 / 4.5	Sep 2020 – Feb 2023
Bachelor's Degree in Electronic Engineering Chungwoon University — S. Korea GPA 3.87 / 4.5	Mar 2016 – Feb 2018
Proverbsville High School — Philippines	Jun 2010 – Mar 2011

CERTIFICATIONS

- CCNA (Cisco Certified Network Associate), Cisco — Dec 2020
- Information Security Engineer, Ministry of Science and ICT (S. Korea) — May 2018
- Industrial Engineer Information Processing, Ministry of Science and ICT (S. Korea) — Aug 2016
- Network Administrator 2, Information Qualification Agency (S. Korea) — Jul 2014
- Driver's License Class 1 (S. Korea) — Jan 2015

WORK EXPERIENCE

ATG (Asset Technology Group), Kyunggi-do, S. Korea	Feb 2023 – Feb 2025
• Customized Hexagon's AWS-based Enterprise Asset Management (EAM) solution for GS Power by developing Python/SQL automation workflows that synchronized performance data across plant machinery and spare parts, enabling predictive maintenance. Reduced manual reporting time by 50% and delivered 100% data availability for internal audits and maintenance planning. • Built API integrations between an AWS-based Enterprise Asset Management (EAM) platform and both external SAP-based partner systems and in-house web services, consolidating asset status data and automating maintenance scheduling across stakeholders. • Partnered with Hexagon India to implement API integrations and SSO features, resolving 80+ front- and back-end issues during pre-go-live customization. Coordinated bilingual technical communication to accelerate issue resolution and ensure deployment readiness (English/Korean).	
SEO Inc, Seoul, S. Korea	Apr 2019 – Aug 2022
• Collaborated within a 2-person IT operations team to maintain 40+ network devices (servers, routers, switches) supporting a 24/7 control room for AI-driven national maritime infrastructure across nine major ports. Ensured 99.9% uptime through proactive monitoring and rapid after-hours incident response during mission-critical events. • Managed IP allocation for over 1,000 endpoints (PCs, servers, and IoT devices) through structured public/private subnet planning, while implementing firewall and ACL policies to ensure secure network segmentation. • Managed 10+ infrastructure-related incidents per month, completing recovery actions within the UPS-powered grace period before full power loss to prevent data corruption and configuration resets. Achieved zero critical outages through rapid failover and hardware replacement during both scheduled maintenance and unexpected failures.	

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, Java

Tools & Systems: ERP · EAM · Oracle DB · Linux · Cisco Routers & Switches

Support & Operations: Troubleshooting · Network Monitoring · Firewall Configuration · API-Based Data Integration
